DCI SECURITY COMMITTEE  
MONTHLY ACTIVITIES REPORT  
NOVEMBER 1978

25X1 1. [ ] Committee members were the guests of the FBI for their 29 November meeting. FBI Director William Webster and other senior FBI officials addressed the Committee and offered their support for its work.

25X1 2. [ ] The Committee staff assisted in the development of a DCI security plan to support activities under the Foreign Intelligence Surveillance Act of 1978 (the so-called "wiretap bill"). This security plan is to be the basis for discussions between the Chief Justice and the Attorney General pursuant to security responsibilities provided for by this statute.

25X1 3. [ ] The Committee Executive Secretary continued to act as security advisor to [ ] and his group in their work on the revision of compartmentation programs. 25X1

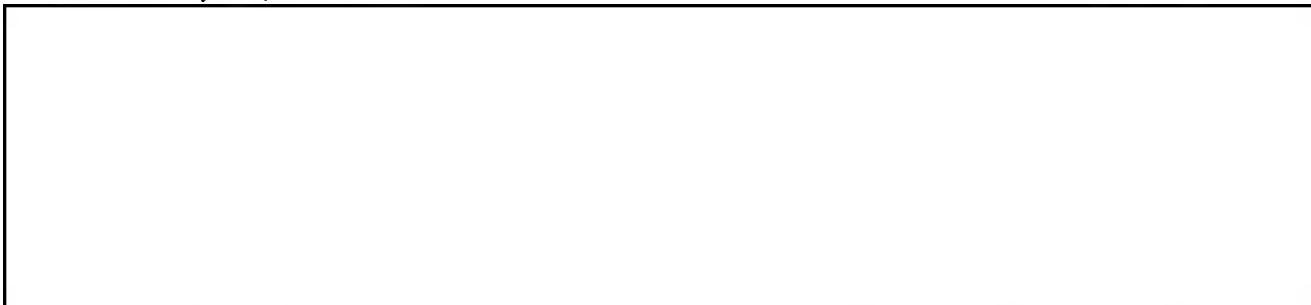

25X1 4. [ ] Overview comments on security measures were submitted for inclusion in the DCI's Annual Report. These covered numbers, apparent causes, perceived effects, problems concerning and available remedies for leaks of sensitive information. The input also described actions taken or in preparation to tighten industrial security procedures, better control the use of classified documents, and provide sound security for U.S. Embassy facilities in Moscow.

25X1 5. [ ] Proposed Community guidance on the adjudication of DCID 1/14 investigations was approved in substance by the Committee. The draft guidance has already been put to use with good effect by some Community agencies. The Committee's Investigative Standards Working Group is continuing its analysis of the productivity and adjudicative value of various elements of Community investigations conducted to DCID 1/14 standards.

~~SECRET~~

25X1 6. [ ] A draft appeals procedure for persons denied access to sensitive compartmented information (SCI) was developed and submitted to Committee members for consideration. Efforts are continuing to gain the necessary approvals for a single Community agency to maintain as a service of common concern a central index of SCI denials. This will permit better security determinations in the case of persons who have previously been considered for SCI access at different Community agencies.

25X1

25X1 8. [ ] The Committee staff continued to work with the COMIREX staff on the proposed revision of the T-K Control Manual, with special emphasis on that portion which deals with control system security features.

25X1 9. [ ] Proposed Community guidance on implementation of E.O. 12065 was completed and forwarded for DCI approval. This would state classification policy objectives, assign tasking on preparation of classification guides, and provide classification criteria for Community use.
